

Project Spotlight

AMERICAN AIRLINES ADMIRALS CLUB

MIAMI INTL. AIRPORT – MIAMI, FL

LOCATION:

Miami International Airport

Miami, FL

INTERIOR PROJECT:

American Airlines Admirals Club

INSTALLATION FIRM:

David Allen Company

Raleigh, NC

ADHESIVE:

Bosti-Set™

Thin Porcelain Tile Adhesive & Sound Reduction Membrane

CHALLENGE

- Install 7,000 square feet of gauged porcelain panels in the American Airlines Admirals Club located at the Miami International Airport
- Tight project deadline
- Faster, more efficient method of installation desired

SOLUTION

- Daltile Slimlite™ thin porcelain tile panels
- Bostik Bosti-Set™ for panel installation:
 1. Faster installation with 0 VOC product
 2. No dust, water, mixing or electricity required during installation
 3. 80% less weight than conventional mortars

RESULT

- Installation completed on time, and under budget
- Less mess & clean up during the installation process, offering the customer a better experience
- Sound reduction as a result of Thickness Control™ Spacer Technology found within Bosti-Set™ adhesive

CUSTOMER TESTIMONIAL

Martin Howard, Executive Vice President-Operations, David Allen Company and currently President of the National Tile Contractors Association

"We were very pleased with Bosti-Set™. It required only a single coat application, so the installation was faster and easier than a conventional mortar. Bosti-Set™ is also easy to clean off tile surfaces before and after cure without the need for water or solvents. Bosti-Set™ has advanced features that allowed us to meet the tight time constraints of this exciting project. In fact, almost double the amount of work was accomplished with the same crew for work originally bid using traditional mortar."
